## DETAILED ACTION

### *Drawings*

1. Figures 1-5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Shockey (6,094,450).

As shown in figures 1-6, Shockey teaches spread spectrum communication system comprising transmitter and receiver for modulating and receiving QPSK

signal at faster rate without the need to increase transmission power. Note that when spreading the data signal with PN sequence and multiplying with the carrier signal, the total output energy of the spreaded signal is changing accordingly.

See column 1, line 6 to column 4, line 47.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References Tiedemann, Jr. et al (5,914,950), Iwane (5,212,814) and Hermesmeyer (4,216,542) are cited because they are pertinent to the QPSK communications sytem.
